Traffic Alert
North Rillito Interceptor (NRI)
Relief Project

This is a series of traffic alerts that will be issued throughout the construction of the North Rillito Interceptor (NRI) Relief Project. These alerts will announce construction, detour and street closure information as it affects residents, businesses and traffic within the area. The Relief project will connect the North Rillito Interceptor and the South Rillito Interceptor in the area of Columbus Boulevard.

During the week of May 11, 2015, the contractor will begin work on the siphon structure along the north bank of the Rillito River, approximately ½ mile west of Swan Road. Work area constraints require temporarily shifting the north Loop multi-use path around the project work area.

- **Signs will be placed to help direct multi-use path users.**
- **This temporary shift will be in place through summer of 2015.**
