Traffic Alert
North Rillito Interceptor (NRI)
Sewer Rehabilitation Project

This is a series of traffic alerts that will be issued throughout the construction of the North Rillito Interceptor (NRI) Sewer Rehabilitation Project. These alerts will announce construction, detour and street closure information as it affects residents, businesses and traffic within the area. The 10-mile long NRI project is being completed in phases; **the current phase's construction boundaries are from Woodland Road to just east of Pantano Road.**

On Friday, **September 4, 2015, the contractor will re-open the westbound travel lanes on Tanque Verde Road between Woodland and Pantano Roads.** East and westbound motorists will be in their respective travel lanes.

On **Tuesday, September 8, 2015, from 8 a.m. to 4 p.m. and on Wednesday, September 9, through Thursday, September 17, 2015, from 9 a.m. to 4 p.m. each day (excluding weekends)** the left (inside) lane of east and westbound Tanque Verde will be closed while the contractor replaces a portion of curb and completes landscape work along the center median.

- Traffic along east and westbound Tanque Verde Road will be reduced to one travel lane in each direction through this area.

The NRI Sewer rehabilitation work along this portion of Tanque Verde was completed one-month ahead of schedule. Pima County and its contractor, B & F Contracting, thank the traveling public for their patience and understanding while this work was under way.

Bicyclists and pedestrians should use caution when riding/walking through the area.

For additional information or to view detailed maps of the area, visit www.sewerimprovements.info or call the information line at 520-622-2527
