## **Continental Ranch Regional Pump Station Force Main Augmentation Project**

Borderland Construction, under contract with Pima County Regional Wastewater Reclamation Department (PCRWRD), has completed seven miles of new 24-inch new dual force main sewer system between the Continental Ranch Regional Pump Station (CRRPS) and the Tres Ríos Water Reclamation Facility (WRF).

### **The Loop pathway between Twin Peaks Road and Wade McLean Neighborhood Park is OPEN**

After the Loop pathway is opened, the contractor will continue with the landscape enhancements, installation of irrigation, trees and shrubs, and stormwater harvesting basins. This final phase of work is scheduled to be completed by mid-August 2024 and will occur while the new path is open. There are no other anticipated impacts along the Chuck Huckleberry Loop path or its users.

The work along this section of pathway – **completed nearly a week early** – is the result of a coordinated effort and recent IGA between PCRWRD, Pima County Flood Control District, Marana Parks and Recreation, and the Town of Marana Water and Water Reclamation Department (Marana Water) to establish, relocate, and pave the remaining 0.7± miles of Loop path south of Twin Peaks Road, including new water harvesting basins and native tree plantings. Relocating the pathway slightly to the east of its current position has moved it out of the footprint of an upcoming Town of Marana water line replacement project and results in a grand total of 4.0± miles of new 16-foot-wide asphalt path, between Ina Road and El Rio Neighborhood Park area.

*The Loop travelers will enjoy a newly paved pathway from just south of the El Rio Neighborhood Park area to Cortaro Road, as a result of the PCRWRD project*

Click the link below to view our [interactive map](https://sewerimprovements.com/crrps-map). It will help you track the progress of construction and which segments of the loop remain accessible during construction.
